

Solutions for Windows Management

Get more performance, reliability and productivity from your Microsoft investments with Quest's award-winning infrastructure management products. We simplify, automate and secure Active Directory, Exchange, SharePoint and Windows and allow you to simplify the management of your Unix and environment through integration with existing Microsoft technologies. Through a deep expertise in IT operations and a continued focus on what works best, Quest helps you meet higher expectations for enterprise IT.

ACTIVE DIRECTORY

Access Manager

Access Manager provides a single console that enables IT to identify and control user and group access to resources such as files, folders and shares throughout the enterprise.

Active Administrator

Active Administrator lets administrators view, audit and report on the ever-changing state of their Active Directory infrastructure and quickly recover problem objects; it also provides Group Policy management.

ActiveRoles AD LDS/ADAM

ActiveRoles Server is the only comprehensive management solution for AD, AD LDS, or both applications at the same time. ActiveRoles Server can be used to consolidate and centralize Active Directory and/or AD LDS management, creating a single point of administration and change control across the enterprise for all Microsoft directory services.

ActiveRoles Exchange Resource Forest Manager

ActiveRoles Exchange Resource Forest Manager synchronizes the provisioning and security settings between a User Account Forest and the Exchange Resource Forest as well as provides a single interface for user account management.

Covering the entire infrastructure lifecycle, Quest delivers innovative products in five main areas:

- Active Directory
- Managing Identities and
- Access
- Unified Communications
- Windows Data Management
- Systems Center
- SharePoint

ActiveRoles Quick Connect

ActiveRoles Quick Connect enables ActiveRoles Server to automatically provision and deprovision from an authoritative data source such as an HR or ERP system and thereby automatically controlling user access. ActiveRoles Quick Connect extends ActiveRoles Server into the provisioning process on non-Active Directory connected systems for end-to-end identity and access synchronization.

ActiveRoles Self-Service Manager

ActiveRoles Self-Service Manager enables administrators to empower application and data owners to securely self-manage their resource access groups while remaining in compliance. The responsibility of access management and compliance is moved from IT to the data owner.

ActiveRoles Server

ActiveRoles Server automates the provision, reprovision and more importantly, deprovision process for users & groups quickly, efficiently and securely in AD and beyond. ActiveRoles Server provides strictly enforced role-based security, automated group management, change approval and easy-to-use web interfaces for self service to achieve practical user and group lifecycle management for the Windows enterprise.

ChangeAuditor for Active Directory

Quest ChangeAuditor for Active Directory proactively tracks, audits, reports, and alerts on vital configuration changes—in real-time and without the overhead of native auditing—in order to determine who made what change when, where and why.

ChangeAuditor for File Systems

ChangeAuditor for File Systems drives the security and control of file systems by tracking all key file and folder changes in real-time. With ChangeAuditor for File Systems, you'll get the "Who, What, When and Where" of any changes, details on previous and new change values and comments on why a specific change was made.

ChangeAuditor for Exchange

Quest ChangeAuditor for Exchange proactively audits the activities taking place in the Exchange environment and provides real-time, in-depth tracking, as well as detailed alerts about vital changes that occur to non-owner and owner mailboxes, administrative groups, mailbox policies, public and private information store, organizational changes, distribution list changes, and more.

Collaboration Services

Collaboration Services displays calendar details, free/busy information and global address lists in your existing Outlook client. Collaboration Services provides secure synchronization with administrative control.

Domain Migration Wizard

Domain Migration Wizard enables migration to Active Directory, consolidation of Windows NT domains and splitting of Windows NT domains.

GPOAdmin

GPOAdmin offers group policy object (GPO) management capabilities for efficient deployment and management of GPOs, providing better infrastructure security and control

InTrust®

InTrust collects, stores, reports and alerts on event data from heterogeneous systems, and controls changes to Exchange, AD and GPOs.

InTrust Plug-in for Active Directory

InTrust Plug-in for Active Directory audits, reports, and alerts on all domain controller activity, as well as tracks all detailed changes to Active Directory and Group Policy.

InTrust Plug-in for Exchange

The InTrust Plug-in for Exchange provides real-time, detailed tracking of all user activity, non-owner access, as well as auditing of configuration changes and permissions to Exchange mailboxes and servers.

InTrust Plug-in for File Access

The InTrust Plug-in for File Access provides real-time, detailed tracking of all user and administrator activity as relating to file/object access.

Migration Manager for Active Directory

Migration Manager for Active Directory simplifies Active Directory to-Active Directory migration and supports Active Directory redesign.

MissionControl

MissionControl provides exceptional visibility regarding Microsoft Identity Lifecycle Manager (ILM) health and finds and resolves issues quickly with 24x7 monitoring and alerting. It enhances system security by auditing and reporting on critical configuration changes as they occur.

NDS Migrator

NDS Migrator migrates users from Novell NDS and Bindery environments to Active Directory and Windows Server 2000/2003/2008

Recovery Manager for Active Directory

Recovery Manager for Active Directory provides granular recovery from inadvertent deletions or modifications to Active Directory data in minutes, instead of hours.

Recovery Manager for Active Directory FOREST EDITION

Recovery Manager for Active Directory FOREST EDITION simplifies the requirements for recovering the entire forest in the event of forest-wide corruption.

Spotlight on Active Directory Pack

Spotlight on Active Directory provides real-time diagnosis, troubleshooting and resolution of all problems related to Active Directory replication, performance and availability.

IDENTITY AND ACCESS MANAGEMENT - QUEST ONE IDENTITY SOLUTION

Desktop Authority

Desktop Authority enables administrators to proactively manage, inventory, secure and support desktops from a central location. It provides complete management of the Windows desktop throughout its lifecycle, reducing the total cost of desktop and application ownership.

Defender

Defender is a standards-based, two-factor authentication solution that supports many token types from multiple vendors and offers a cost-effective alternative to more expensive, proprietary, and support-intensive solutions.

Enterprise Single Sign On (ESSO)

Enterprise Single Sign-on uses the power of Active Directory for universal single sign-on while strengthening security, improving end user and IT efficiency, and satisfying compliance demands.

Privilege Manager for Unix

Privilege Manager for Unix is a policy-based access control system that restricts authorization of the root password to administrators for common tasks.

Reporter

Reporter collects, compares, reports on and resolves Active Directory and Windows-based configurations for change auditing, Windows security assessments, or AD pre- and post-migration analyses.

SafeKeeping

SafeKeeping is a web-based virtual appliance that enables secure storage, retrieval and changing of administrator passwords.

Password Manager

Password Manager enables end users to reset forgotten passwords securely using stronger password policies, while reducing the help desk load.

Quest Authentication Services

Quest Authentication Services allows Unix, Linux and Mac systems to use the access, authentication and authorization tool already in place for Windows resources (Active Directory)—extending AD's capabilities including Group Policy for Unix/Linux.

Quest Single Sign-on for Java

Quest Single Sign-on for Java provides a unified platform for identity management of Java applications and services from the same Active Directory infrastructure used to provide single sign-on for Windows resources.

Webthority

Webthority enables authentication and authorization based on Active Directory (or any existing directories) roles and rules while providing centralized management of all remote access accounts and activities.

UNIFIED COMMUNICATIONS

Archive Manager

Archive Manager provides a platform for Microsoft-centric archiving to lower storage costs, enable fast eDiscovery response and lock down critical messaging data for strict compliance.

Coexistence Manager for Notes

Coexistence Manager for Notes complements Notes Migrator for Exchange to ensure a seamless migration from Notes to Exchange, providing high-fidelity e-mail, calendaring, and document hyperlink coexistence.

Exchange Migration Wizard

Exchange Migration Wizard migrates your environment directly to Exchange 2003/2007 with true coexistence through synchronization and ZeroIMPACT to end users.

GroupWise Migrator for Exchange

GroupWise Migrator for Exchange enables organizations to migrate from GroupWise to Exchange while preserving important organizational information and minimizing impact to users.

InTrust® Plug-in for Exchange

The InTrust Plug-in for Exchange provides real-time, detailed tracking of all user activity, non-owner access, as well as auditing of configuration changes and permissions to Exchange mailboxes and servers.

MessageStats™

MessageStats gathers, analyzes and reports on Exchange and other messaging components, enabling executives and administrators to align e-mail usage with service levels, migrations, capacity planning, policies compliance, and strategic goals.

Migration Manager for Exchange

Migration Manager for Exchange is the comprehensive solution for seamless inter-organization migrations from Exchange 2000/2003.

Migration Suite for Exchange

Migration Suite for Exchange is a ZeroIMPACT solution for planning and executing your migration projects to Exchange 2007/2003 from Exchange 5.5/2000/2003.

Notes Migrator for Exchange

Notes Migrator for Exchange enables you to migrate directly from Lotus Notes to Exchange with robust project management and reporting tools, and minimal impact to users.

Policy Authority for Unified Communications

Policy Authority for Unified Communications protects organizations from external attacks, prevents intentional or inadvertent leaks of sensitive data, and enables IT to demonstrate compliance concerning the use of real-time communications.

Recovery Manager for Exchange

Recovery Manager for Exchange rapidly and efficiently discovers and recovers business-critical Exchange data to aid with electronic investigations.

Spotlight on Messaging

Spotlight on Messaging provides real-time diagnostics, troubleshooting and problem resolution for Exchange, Office Communications Server and Blackberry.

SHAREPOINT

File Migrator for SharePoint

File Migrator for SharePoint enables you to migrate content in file shares and NDS to SharePoint 2007.

Migration Manager for SharePoint

With Migration Manager for SharePoint, you can migrate sites, document libraries and lists from SharePoint 2003 to SharePoint 2007, as well as consolidate and reorganize content from multiple SharePoint 2007 locations.

MANAGE UNIFIED COMMUNICATIONS

Notes Migrator for SharePoint

Notes Migrator for SharePoint analyzes and migrates Notes, QuickPlace and Domino.Doc application content to SharePoint.

Public Folder Migrator for SharePoint

Public Folder Migrator for SharePoint allows you to easily perform bulk migrations of Exchange Public Folder content to SharePoint and consolidate collaboration platforms for easier management.

Recovery Manager for SharePoint

Recovery Manager for SharePoint provides granular recovery of anything in the backup of your SharePoint content database— individual documents, lists, document libraries, sites, workspaces. It also provides a convenient way to search, locate and preview any item from across multiple database backups before restoring it. You can use the backups you already have; no proprietary platforms and no site- or item-level backups required.

Site Administrator for SharePoint

Site Administrator for SharePoint provides discovery, site and content browsing, data collection, reporting, and policy and permissions management to help you understand and manage your entire SharePoint environment.

Web Parts for SharePoint

Web Parts for SharePoint enables the rapid development of custom applications using data from anywhere in the enterprise. The ability to build applications, menus and dashboards through configuration, rather than code, reduces the cost and time to build applications by up to 80 percent.

SYSTEM CENTER

Quest Management Xtensions - Operations Manager 2007 Edition

With Quest Management Xtensions - Operations Manager 2007 Edition organizations with heterogeneous environments can now use the comprehensive monitoring and alerting capabilities of Operations Manager to manage their entire IT infrastructure.

Quest Management Connectors – Operations Manager 2007 Edition

Quest Management Connectors unite the System Center Operations Manager 2007 platform with more than 15 non-Microsoft management platforms for monitoring and proactive issue resolution.

Quest Management Pack for Oracle

The Quest Management Pack for Oracle provides the System Center Operations Manager user / administrator “vital signs” monitoring support for Oracle 9i and 10g databases deployed on their managed resources.

Quest Management Pack for Cisco - Operations Manager 2007 Edition

Quest Management Pack for Cisco - Operations Manager 2007 Edition extends the Windows management capabilities of System Center Operations Manager 2007 to Cisco devices for monitoring and proactive issue resolution.

Quest Management Pack for AS400- Operations Manager 2007

Quest Management Pack for AS400- Operations Manager 2007 Edition extends the Windows management capabilities of System Center Operations Manager 2007 to IBM AS400/iSeries mainframes for monitoring and proactive issue resolution.

Quest Management Pack for z/OS- Operations Manager 2007 Edition

Quest Management Pack for z/OS- Operations Manager 2007 Edition extends the Windows management capabilities of System Center Operations Manager 2007 to IBM z/OS/MVS/zSeries mainframes for monitoring and proactive issue resolution.

Quest Management Pack for .NET

Quest Management Pack for .NET extends MOM 2005 and Microsoft Systems Center Operations Manager 2007 to monitor .NET applications and collect root-cause diagnostic information in real time.

Quest Management Xtensions - Configuration Manager 2007 Edition

Quest Management Xtensions - Configuration Manager 2007 Edition enables organizations with cross-platform environments to extend the management capabilities of Configuration Manager to non-Windows systems, including Unix, Linux, Mac OS X and VMware ESX Server.

About Quest Software, Inc.

Quest Software, Inc., a leading enterprise systems management vendor, delivers innovative products that help organizations get more performance and productivity from their applications, databases, Windows infrastructure and virtual environments. Quest also provides customers with client management through its ScriptLogic subsidiary and server virtualization management through its Vizioncore subsidiary. Through a deep expertise in IT operations and a continued focus on what works best, Quest helps more than 100,000 customers worldwide meet higher expectations for enterprise IT. Quest Software can be found in offices around the globe and at www.quest.com.

Quest Management Xtensions for SMS 2003

Quest Management Xtensions for SMS enables organizations with complex, heterogeneous environments to extend the Windows management capabilities of SMS 2003 to non-Windows systems such as Unix, Linux, Mac OS X and VMware ESX Server.

Quest Management Xtensions for Device Management

With Quest Management Xtensions for Device Management, organizations with complex IT environments can now natively extend the capabilities of Configuration Manager from the Windows domain to over 115 non-Windows systems and devices, including UNIX, Linux, Mac OS X, AS400, Network Devices, Storage Devices and more.

WINDOWS DATA MANAGEMENT

Storage Consolidator for Windows

Storage Consolidator for Windows automates the online migration of file server data with security settings intact as a part of a server consolidation project.

Storage Manager for Windows

Storage Manager for Windows enables storage administrators to perform intelligent assessment and automate crucial ongoing management tasks to ensure an optimized Windows storage network.
