

NetVault Backup is a cross-platform **backup and recovery** software solution that safeguards your data and applications in both physical and virtual environments – from one intuitive console. This scalable enterprise solution supports dozens of server and application platforms.

Discover five amazing things you can do with NetVault™ Backup.

1 Get up and running faster.

NetVault Backup's modular architecture makes it easy for you to deploy and upgrade.

Installation and configuration took three hours or less for 55% of NetVault customers.

4 Be confident your data can be recovered.

NetVault Backup plug-ins give you consistent, reliable, point-and-click restore for your messaging and database applications—without requiring you to be an expert.

"NetVault just works. We don't have to fuss with it much once it is installed and configured correctly."

– Robby Wright, Chief Technology Officer, Abtech Systems.
