Who is this Training For?

The primary audience for this training includes Active Directory Administrators, Exchange Administrators, and Windows Server Administrators.

The training is also relevant for Enterprise Desktop Administrators for their organizations.

Course Description:

This course is designed to provide you to assist your organization with Change Auditor by providing detailed knowledge of the architecture, installation, and configuration, as well as its integration into various source systems. If you are taking this course to help your organization successfully migrate, or if you're consultant going for a refresher course, or becoming certified, this course will lead you down the path to success as your new knowledge will assist your company with overcoming business disruptions, tight timelines, and data breaches.

Learning Objectives

Upon completion of this training, the student will be able to:

- Describe the detailed architecture of CA and its components
- Describe the core features of CA
- Describe the Security Architecture of CA
- Plan the deployment of CA in a production environment

- Deploy and configure CA
- Regularly administer and perform maintenance of CA

Prerequisites and Knowledge Base

This course is designed for candidates having System Center Configuration Manager 2012, Windows Server, Security, and Networking experience in an enterprise environment.
