

Stat Quickstart Services (Remote and Onsite)

Description

The Stat Quickstart Services Offering consists of (i) two (2) prepaid eight - hours days ("Days") of architecture assessment and eight (8) prepaid eight - hour days of consulting during which Quest will provide services to assist Customer with the architecture, deployment and configuration of the Stat Software (the "Activities") ; (ii) twelve (12) hours of project management; and (iii) nineteen (19) student days of training (the "Training") . The project management shall be provided over the course of providing the Activities and the Training.

Approach and Activities

The planned Activities include:

Architecture Assessment (Two Day's - Remote)

A Quest Stat Architect will conduct a Stat Architecture Assessment Workshop. The Activities planned for this workshop include:

- Reviewing of Customer's existing change management process and designing a Stat change management process (a "workflow")
- Working with Customer's implementation team to define and document specific configuration elements required by Stat
- Defining a proposed architecture of Stat for the Customer environment
- Creating an implementation roadmap
- Providing knowledge transfer to Customer's organization regarding the implementation architecture and the roadmap
- Producing a Stat Architecture Specification document as the Stat implementation blueprint and standard for evaluation of ongoing Stat implementation and use

Stat Deployment and Configuration (Eight Days – Onsite, as Two Engagements)

The Deployment and Configuration Activities will be scheduled as two (2) onsite Engagements. The Engagements will be scheduled following the delivery of the Stat Architecture Specification document and upon mutual agreement that the prerequisites for deployment have been met.

Stat Deployment and Configuration Activities typically include some of the following:

- Installation of Stat Windows Client on Stat Administrator's desktop
- Customization & Execution of Stat Database Create Scripts
- Customization & Execution of ERP Specific Database Scripts
