

Backup & Disaster Recovery Suite

VERSATILE DATA PROTECTION PRICED BY THE TERABYTE

Say goodbye to the need for compromise in your data protection solution. Other vendors require you to compromise on your backup and disaster recovery solution. You either overpay for a one-size-fits-all approach that's more than you need, or under-protect because you can't or don't want to pay the high prices other vendors require.

You don't have to compromise. With the flexibility of the Quest® Backup & Disaster Recovery Suite, you can match your backup to your business and make your organization more resilient.

One suite with three types of data protection, the Backup & Disaster Recovery Suite offers full access to the Quest data protection software portfolio — Rapid Recovery, NetVault® Backup, and vRanger® — priced by the front-end terabyte. Mix and match those products to meet your recovery point objective (RPO) and recovery time objective (RTO) requirements. Purchase what you need today, and then grow that

capacity as your business grows. Protect across physical, virtual and cloud with one all-inclusive suite that can deliver significant cost savings.

PROTECTION WITHOUT COMPROMISE

Match your backup to your business and keep your business resilient:

- Scale to protect thousands of VMs via agentless technology, active block mapping, compression and deduplication
- Provide high availability through 288 snapshots/day, Virtual Standby, and Live Recovery
- Ensure that critical workloads are restored in minutes, not hours
- Protect your enterprise with scalable, unparalleled ease of use
- Reduce your data storage footprint by up to 90 percent
- Experience potential cost savings of up to 55 percent in large environments of over 250TB

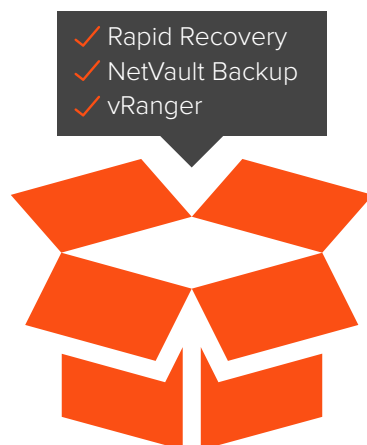

With the Quest Backup & Disaster Recovery Suite, you can save up to 55 percent on large scale deployments.

BENEFITS:

- Access the data protection your business needs when you need it; mix and match to fit your RPO and RTO needs.
- Choose from three types of protection to maximize flexibility and resiliency.
- Get high-speed protection for mission-critical applications in both physical and virtual environments.
- Back up to tape using any product in the suite.
- Replicate data to remote sites and to the cloud.
- Protect virtual environments agentlessly.

The Backup & Disaster Recovery Suite includes Quest's data protection software portfolio:

- **Rapid Recovery** — Back up in minutes and restore in seconds across physical, virtual and cloud environments.
- **NetVault Backup** — Scalable backup and recovery for large amounts of data and business-critical applications such as DB2 and SAP.
- **vRanger** — Fast, scalable backup, replication and restore for VMware and Hyper-V virtual environments.

	Aggressive data protection for critical applications or users	Scalable backup for broad use across a diverse environment	Protect entire VMware and Hyper-V environments in minutes
Product	Rapid Recovery	NetVault Backup	vRanger
Solution	Award-winning backup, recovery, and restore capabilities for mission-critical applications	High-speed, scalable enterprise-level backup and recovery for large volumes of data across varied environments	Fast, easy agentless backup for virtual environments, with included replication
Recovery speed	Seconds to minutes	Minutes when paired with a DR4100 appliance	Minutes
When	<ul style="list-style-type: none"> • Ideal for Microsoft-centric shops; fantastic at Exchange, SQL Server and SharePoint recoveries • Works with VMware, Hyper-V 	<ul style="list-style-type: none"> • Broad enterprise environment support • Tape support • Broad Windows/Linux support • Support for Mac OS X, HP-UX Itanium, AIX, Solaris (SPARC and x86/x86-64), Oracle, SAP, DB2, VMware, Hyper-V, Citrix Xen, KVM • Traditional style backup 	<ul style="list-style-type: none"> • Ideal for virtual settings, including Hyper-V and VMware environments • Supports DR4300 integration

ABOUT QUEST

Quest helps our customers reduce tedious administration tasks so they can focus on the innovation necessary for their businesses to grow. Quest® solutions are scalable, affordable and simple-to-use, and they deliver unmatched efficiency and productivity. Combined with Quest’s invitation to the global community to be a part of its innovation, as well as our firm commitment to ensuring customer satisfaction, Quest will continue to accelerate the delivery of the most comprehensive solutions for Azure cloud management, SaaS, security, workforce mobility and data-driven insight.
