

Binary Tree Migrator for Notes

Quest

Binary Tree Migrator by Quest for Notes uses a proven, trusted process to automate your migration from Notes/Domino. It migrates Domino mailboxes and archives to the destination of your choice, including to Microsoft Exchange mailboxes, local archives, and on-premises or cloud-based Exchange archive mailboxes. With Binary Tree Migrator for Notes, you get unmatched data fidelity, an easy admin dashboard and uninterrupted calendar management.

FEATURES

- User mail files, mail-in databases and resources migration
- Built-in Automated Workload Distribution (AWD) functionality
- Real-time migration status monitoring
- Azure deployment support
- Office 365 and on-premises Exchange server support
- Mail archive migration support

BENEFITS

- Maintain data fidelity for migrated contacts and calendars
- Manage and execute the entire migration through a single dashboard
- Avoid downtime, late nights and weekend projects
- Allow users to work during the migration with no end user involvement or impact
- Automate target environment choices, recovery solutions and user migration
- Ensure data fidelity from start to finish with intelligent design
- Scale to fit organizations of all sizes, even the largest enterprises
- Migrate archives with the included Notes Archive Migrator

NOTES

- Includes double-byte character support
- User Interface available in English only
