BINARY TREE®
by Quest

Binary Tree Migrator Pro for Exchange

Binary Tree Migrator Pro by Quest for Exchange automates and simplifies enterprise Exchange migrations within a current Exchange environment, to later Exchange versions, or even to Office 365 – including GCC High tenants. This powerful migration tool does much more than merely move mailbox data—it moves users. Binary Tree Migrator Pro for Exchange has a powerful scheduling engine to give you total control at your fingertips, automating data collection, scheduling, reporting, and user communication.

Features

- Move from older versions of Exchange to modern Exchange or even Office 365

- Controls via command line or User Interface

- Built-in reports

- Scheduling options with forecasted completion timeline

- Centralized admin features with real-time schedules

- Leverages PowerShell for maximum migration throughput

- Public Folder migration capabilities

Specs

- Runs on Windows Technologies: Windows Server, IIS, .NET, SQL

- PowerShell Migration Engine

- Automation and scheduling

- Self Service Web Portal

- Central Administration

- Almost 100 mailbox and AD attributes with migration time estimates

Benefits:

- **Migrate to newer versions of Exchange or to Office 365 to take advantage of modern servers and SaaS capabilities**

- **Experience a fast migration with powerful engines, all with detailed schedule capabilities to fit your migration timelines**

- **Migrate public folders for greater application of migration possibilities**

- **IT can view all aspects of the migration from a centralized console, making management easier than ever**
