

# Binary Tree Power365® Integration Pro

Binary Tree Power365® Integration Pro by Quest delivers an automated email address rewrite service for a zero-touch, day-one collaboration experience without downtime along with unified brand identity through common email domains—on both inbound and outbound email—from different Office 365 tenants. You also get all features of Binary Tree Power365 Integration by Quest and Binary Tree Power365 Migration by Quest for a complete multi-tenant solution.

## FEATURES

- Unify your email brand identity with Email Rewrite Services
- Share domains across Office 365 Environments
- Move users to a new domain before migrating mailboxes
- Keep users on their original domain after migrating mailboxes
- Move domains between tenants with no downtime
- Automatic environment discovery and reporting
- Automatic Matching and Mapping, no manual lists to manage
- Unified address lists across business units or organizations
- Maintain collaboration with calendar sharing and free/busy lookups
- Easy account provisioning to create and license users
- No RPC or remote registry access
- PowerShell RestAPI
- Supports hybrid and resource forests
- Migrate mailbox server side rules, user's Outlook signatures and auto replies (Out of Office)
- Create and migrate Azure AD B2B Guest Users

## BENEFITS

- Day One collaboration for your mergers and acquisitions projects
- Gain a unified brand on day one
- Pick and choose which users receive and send mail from a common domain
- Automated domain moves for quick, easy transitions with no email downtime
- Includes all of the capabilities in Binary Tree Power365 Integration by Quest

## NOTES

- Professional Services are recommended for Binary Tree Power365 Integration Pro
- Binary Tree Power365 Integration Pro includes double-byte character support
- User Interface available in English, German, Chinese, Japanese and French
