

# Binary Tree Power365® Migration

Quest®

Binary Tree Power365® Migration by Quest lets you migrate mailboxes, archives, and content between Office 365 tenants. You can migrate from, or to, on-premises or hosted Exchange environments. You can choose options to migrate Teams, OneNote, Groups, SharePoint and One Drive content for a comprehensive content migration. And Binary Tree Power365 Migration is truly unlimited – no data caps, archive restrictions or limits on passes.

## FEATURES

- Migrate mailboxes and archives between Office 365 tenants
- Migrate mailboxes from or to Exchange on-premises or hosted environments
- Schedule mail sync events and number of recurrence times
- Automatically discover users and mail-enabled groups
- Manage smaller subsets of logically-grouped users by leveraging existing on-premises Active Directory groups
- Use independent sync schedules and mailbox cutover events
- Schedule when users are created, synchronized and cutover
- Match users between tenants
- Automate notification to end-users of new target mailbox availability
- Direct Outlook profiles to new, target mailboxes
- Maintain litigation holds
- PowerShell RestAPI
- Migrate mailbox server side rules, user's Outlook signatures and auto replies (Out of Office)

## BENEFITS

- Built on Azure for security and data fidelity
- Save time and money with a high velocity migration
- Schedule a migration for when it is most convenient
- Easily configured SaaS Platform
- Options to migrate OneDrive and SharePoint content

## NOTES

- Professional Services are available for Binary Tree Power365® Integration by Quest
- Binary Tree Power365 Migration includes double-byte character support
- User Interface available in English, German, Chinese, Japanese and French
