

Quest® On Demand Migration

Simple, secure tenant-to-tenant Office 365 migrations

Organizations facing mergers and acquisitions need a fast, safe and easy way to consolidate Office 365 tenants. If done manually, there is a chance that mailboxes, directories or messages could be lost or deleted, objects could be duplicated and users unnecessarily disrupted — causing additional frustration and costs, not to mention project delays and potential down time.

And the larger the organization, the more complex the migration. That means lots of planning and scoping has to happen before the project can even begin.

With Quest® On Demand Migration, you can forget about the complexity of migrating Office 365 tenants. On Demand Migration is a simple Software as a Service (SaaS) solution that enables you to get started immediately. Start

by discovering the source and target infrastructures and then decide which users to migrate and plan where they should be located. With On Demand, you'll be able to identify potential issues from the start.

On Demand Migration enables email and data coexistence from day one, so you never have to worry about impacting users' workdays. And dashboard monitoring lets you track the progress of the project from start to finish.

FEATURES

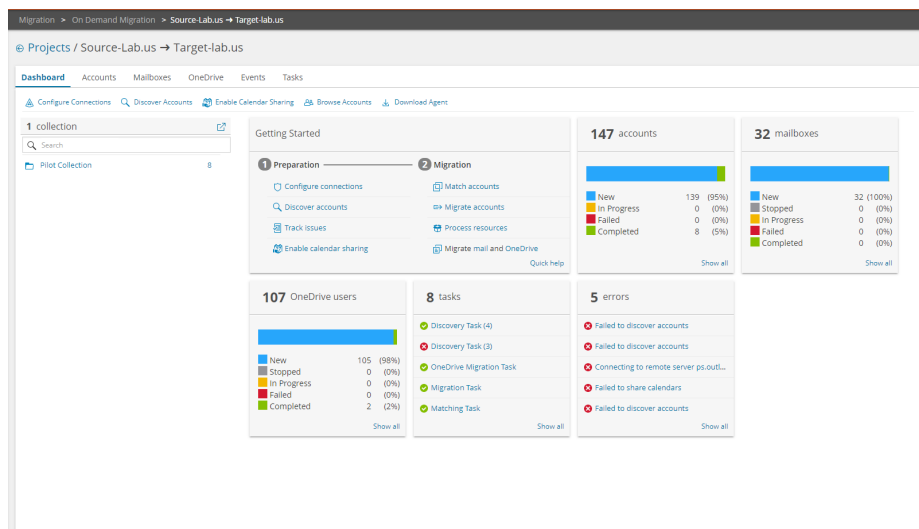

Pre-migration discovery and planning

Kick off your migration project with peace of mind by running the On Demand Migration discovery wizard to determine which accounts will need to be migrated and when. You'll be able to:

Manage end-to-end, tenant-to-tenant Office 365 migrations through a single interface.

BENEFITS:

- Accelerate Office 365 migrations with pre-migration discovery, matching and planning
- Safely and quickly merge or consolidate Office 365 tenants
- Ease impact to users with resource coexistence and seamless resource support for target users
- Alleviate delays by tracking and resolving issues with real time monitoring
- Track and monitor the end to end migration progress

Manage end-to-end, tenant-to-tenant Office 365 migrations through a single interface.

SYSTEM REQUIREMENTS

CLOUD PLATFORM

Microsoft Azure

DIRECTORIES

Microsoft Azure AD

Office 365

MESSAGING PLATFORMS

Microsoft Exchange 2016

STORAGE PLATFORMS

Microsoft OneDrive 2016

Avoid delays by identifying and matching all source and target users to eliminate duplication.

Determine what the target infrastructure will look and where user resources will be located.

Ensure coexistence

On Demand Migration helps you ensure free and busy lookups will continue to work as expected for Skype for Business Online users. Users in the target tenant will also be able to send emails to users in the source tenant throughout the duration of the migration.

Complete tenant-to-tenant migration

Our simple SaaS solution enables you to consolidate two separate Office 365 tenants into one — regardless of size. On top of that, you'll be able to migrate all data (individual or shared) associated with Azure AD accounts, or choose to apply filters from source to target tenant for all directories, all while the accounts are being quickly and safely migrated or consolidated. And accounts that have already moved to the target tenant will still be able to access resources on the source tenant during the remainder of the migration to ensure complete coexistence.

Client configuration management

With On Demand, existing applications will be able to work as expected for all migrated users throughout the duration of the migration project, and Outlook clients will be updated to point to the new target tenant when the migration is complete.

Project management

On Demand Migration helps ease users migration scheduling and enables you to migrate user groups in batches or individually. The Quest solution also provides real-time project tracking throughout the migration to ensure issues can be identified and resolved quickly via dashboard monitoring and event log troubleshooting.

ABOUT QUEST

At Quest, our purpose is to solve complex problems with simple solutions. We accomplish this with a philosophy focused on great products, great service and an overall goal of being simple to do business with. Our vision is to deliver technology that eliminates the need to choose between efficiency and effectiveness, which means you and your organization can spend less time on IT administration and more time on business innovation.
