

SharePlex® by Quest®

Database replication software for high availability, scalability and reporting

Businesses are under increasing pressure to get more value from their data while driving down cost. In addition, DBAs are trying to ensure database operations run smoothly while ensuring data resiliency through high availability (HA) and disaster recovery (DR). With all this complexity and risk, it's tempting to make even more investment in your native tools. But what if you could achieve your database goals – without purchasing expensive native data replication tools? You'd free up resources to invest in new ways to drive your business forward.

With SharePlex® by Quest®, you can replicate Oracle data – at a *fraction* of the price of native tools. Easily achieve high availability, increase scalability, integrate data and offload reporting with this flexible solution that

supports multiple business use cases. Move your data – not your budget – with affordable replication.

FEATURES

- **All-in-one license** — Get built-in monitoring, conflict resolution, data comparison and synchronization and more for one low price – at 10 percent the total cost of ownership of other replication solutions – no add-ons or management packs needed.
- **One tool, many uses** — Move data from Oracle to other data platforms, on-premises or in the cloud, to achieve a variety of business goals – with a single, comprehensive data replication tool that's easy to install and use.
- **Simplify Oracle database migrations and upgrades** — Migrate or upgrade your Oracle databases without business interruption to achieve compliance, avoid risk and reduce stress.

“We have been able to achieve close to 100 percent uptime for years at a time on our critical databases using SharePlex.”

Ken Jones, Senior Vice President of IT Operations, Priceline.com

BENEFITS:

- Avoid expensive upgrades, add-ons and management packs with a low-cost, all-inclusive replication toolset.
- Achieve the five 9's of high availability by seamlessly moving data across your Oracle database environment.
- Perform impact-free Oracle database migrations and upgrades without downtime or data loss.
- Offload reporting to support analytics and big-data projects and improve Oracle database performance.
- Move your Oracle data to SQL Server to increase scalability, provide offload reporting and take advantage of Microsoft business intelligence tools.
- Easily move data from Oracle into Kafka to support your streaming needs with high accuracy and fault tolerance with low overhead
- Take advantage of award-winning 24x7 support.
- Access educational resources in our online community to further optimize replication.
- Business intelligence support - Integrates with your SQL Server and Kafka environments to support your business intelligence initiatives.

Availability

High availability/
Disaster recovery

Easily meet your business needs and specific use cases with SharePlex.

“We have eliminated the two hours of downtime we used to have every night for our reporting database by switching to SharePlex.”

Sean Scott, Oracle DBA,
Bodybuilding.com

The SharePlex data replication process

- **Near real-time data integration and replication** — Easily move your Oracle databases across editions, versions and operating systems.
- **Proven ease of use** — Get up and running in 15 minutes through a streamlined configuration process.
- **Award-winning, 24x7x365 support** — Reduce risk with unrivaled, highly rated support that’s earned multiple industry awards.
- **Support for Oracle Standard Edition, Enterprise Edition and Cloud environments** — Easily move your Oracle databases across editions, versions and operating systems.

ABOUT QUEST

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Office 365 management, and cyber security resilience, Quest helps customers solve their next IT challenge now. Quest Software. Where next meets now.
