

# Enterprise Reporter for Office 365

Discovery and reporting across Microsoft Azure and Office 365

Millions of people rely on Microsoft Azure and Office 365 every day for their enterprise applications, and it's up to IT to facilitate their productivity. But because organizations are storing more and more sensitive data in Office 365 and Azure, IT teams must also be concerned with security and compliance. In particular, they need to know who can access what across Azure Active Directory (AD), Azure resources, Exchange Online and OneDrive for Business, and be able to efficiently manage the subscriptions and licenses for Office 365 workloads and Azure to ensure users can access the applications they need without overspending.

Quest® Enterprise Reporter for Office 365 helps ensure the security of Azure resources, Azure AD, Exchange Online and OneDrive for Business environments by delivering visibility into users, groups, permissions, configurations, vulnerabilities, licensing and more. Detailed, customizable reports provide insight into workloads across Office 365, so organizations can protect sensitive data and more easily prepare for internal and external audits. Visibility into tenants, subscriptions and licensing service plans makes it easy to optimize Office 365 license allocation and service plan decisions. With Enterprise Reporter for Office 365, you get additional visibility into resources, like virtual machines (VMs)

## BENEFITS:

- Improves security and compliance by providing visibility into the configuration of critical IT assets in Azure, Azure AD, Exchange Online and OneDrive for Business
- Enables you to stay on top of who can access Azure AD users, groups, roles and applications; shared files and folders across OneDrive for Business; Exchange mailboxes and public folders; and Azure resources, including VMs, disks, network security groups, storage accounts and more
- Makes it easy to optimize Office 365 license allocation and service plan decisions with visibility into your tenants, subscriptions and licensing service plans, and Azure resource optimization with visibility into virtual machines and disk utilization
- Facilitates a smooth domain migration or consolidation project by pinpointing Azure AD user and group dependencies, matching conflicts, and disabled accounts before the migration starts
- Scales to Azure AD and Office 365 environments of any size and location

## SYSTEM REQUIREMENTS

For a complete list of system requirements, see the [Release Notes](#).

### EXAMPLES OF BUILT-IN REPORTS BY CATEGORY

#### Azure Active Directory:

Azure Tenant Information  
Application Service Principals Identities  
Membership and Roles  
Azure Users, Roles, Groups and Members

#### OneDrive for Business:

Configuration Settings  
Drive Permissions  
File and Folder Permissions  
Access Link Information

#### Exchange Online:

Distribution Group Members and Details  
Mailbox Overview, Delegates and Details  
Mailbox and Public Folder Permissions

#### Azure:

Azure Resource Information  
Resource Access, Group, Subscription Information  
Virtual Machine and Disk Information

#### Subscription and licenses:

Service Plan Usage  
Subscription Information  
Licensed Users

#### Hybrid:

Exchange and Exchange Online Mailbox Permissions for Account  
OneDrive and NTFS File and Folder Permissions  
[View Full Report List](#)

and disks hosted in Azure with information on how many, how large, how they are configured and more, so you can continue optimizing your environment and save on licensing costs. And automated reports help reduce IT workloads while ensuring stakeholders have the information they need, when they need it.

## FEATURES

### Security and compliance visibility

Gain visibility into the configuration of critical IT assets in Azure AD, Exchange Online and OneDrive for Business, as well as Azure, with flexible security reporting. Comprehensive reporting provides the insight necessary to ensure cloud security, as well as compliance with internal policies and external regulations.

### Insight into permissions

Stay on top of who can access which resources across your Microsoft Azure, Azure AD, and Office 365 environment, including, Exchange Online and OneDrive for Business, with permissions reporting on:

- Azure AD users, groups, roles, applications and devices
- Shared files and folders across OneDrive for Business
- Mailboxes and public folders in Exchange Online
- Azure resources, including VMs, disks, network security groups, storage accounts and more

### Visibility into tenants, subscriptions and licensing

Easily optimize Office 365 license allocation and service plan decisions with visibility into your tenants, subscriptions and licensing service plans, as well as resources hosted in Azure, such as virtual machines, storage accounts and disks.

### Pre-migration assessment

Ensure a smooth domain migration or consolidation project by pinpointing Azure AD user and group dependencies, matching objects, potential conflicts, and disabled accounts before the migration starts.

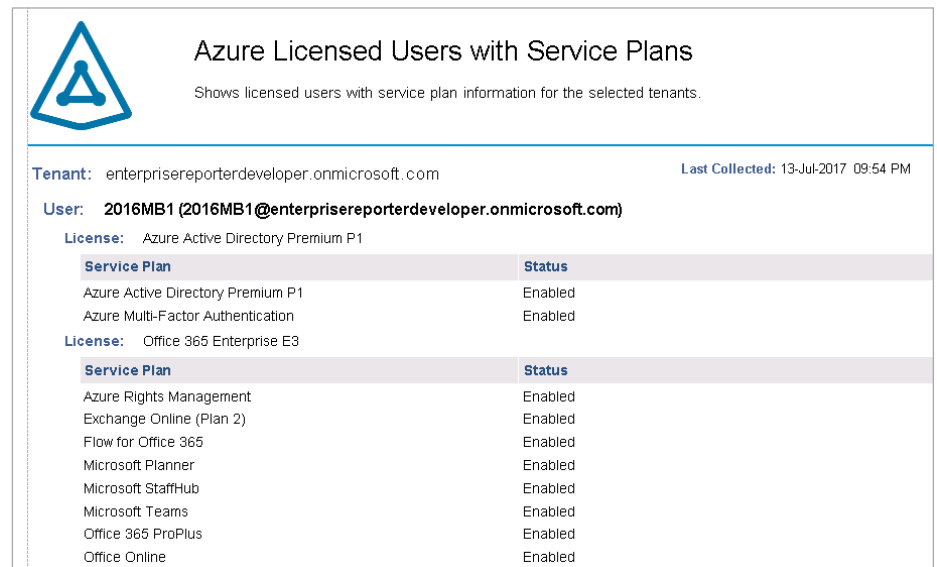

Figure 2: With Enterprise Reporter for Office 365, you can optimize license allocation and service plan decisions with visibility into tenants, subscriptions and licensing service plans.

Enterprise Reporter for Office 365 helps ensure the security of Azure AD, Exchange Online and OneDrive for Business environments.

#### **Scalable data collection**

Scale to Azure AD and Office 365 environments of any size and location. Schedule collections during off-peak hours to minimize the impact on network and server performance, and leverage the distributed collection architecture for load balancing.

#### **Customizable reports**

Perform efficient, effective data analysis and satisfy the unique informational needs of your organization using predefined reports or by creating new reports with additional attributes. Customize any report with advanced filtering, and choose from multiple formats, including PDF, HTML, MHT, RTF, XLS, XLSX, CSV, text and images.

#### **Automated reporting workflows**

Ensure stakeholders get the reports they need, when they need them, with automated report generation and flexible delivery schedules that can be sent with email.

#### **Separation of duties (SoD)**

Honor departmental and business function boundaries by enabling auditors, help desk staff, IT managers and other stakeholders to get exactly the reports they need and nothing more.

#### **Common reporting portal**

Export reports to our [software knowledge portal](#) for a unified reporting interface across the entire family of Quest [security and compliance solutions](#).

#### **ABOUT QUEST**

At Quest, our purpose is to solve complex problems with simple solutions. We accomplish this with a philosophy focused on great products, great service and an overall goal of being simple to do business with. Our vision is to deliver technology that eliminates the need to choose between efficiency and effectiveness, which means you and your organization can spend less time on IT administration and more time on business innovation.
