

erwin[®] by Quest[®] Portfolio

At a glance

erwin[®] by Quest[®] provides enterprise modeling and data intelligence software that connects all aspects of your business, technology and data architectures for accurate, real-time insights that fuel results. The erwin by Quest portfolio combines enterprise architecture, business process and data modeling with data catalog, data quality and data literacy capabilities. The result is that companies can discover, assess, govern, activate and socialize their data assets using one platform to maximize the business impact of their data. Through automation and a holistic approach to data management and data governance, erwin by Quest customers achieve an unmatched return on investment as they turn information into opportunity.

erwin Data Modeler

erwin Data Modeler by Quest is the first and most trusted data modeling software for visualizing metadata and database schema to understand complex data sources, as well as design and deploy new ones. Discover and document any data from anywhere for consistency, clarity and artifact reuse. erwin Data Modeler also includes enterprise-class NoSQL data modeling with support for Couchbase, Cassandra and MongoDB.

erwin Data Intelligence

erwin Data Intelligence by Quest unites the capabilities of erwin Data Catalog, erwin Data Quality and erwin Data Literacy for greater understanding of and access to available data assets, guidance on their use, and guardrails to ensure data policies and best practices are followed. Automatically harvest, enrich and curate metadata from a wide array of data sources, operational processes, business applications and data models into a central catalog.

Use integrated data profiling and quality assessment to understand data fitness and target improvement. Make asset discovery and collaboration easy for IT, data governance teams and business users.

erwin Data Catalog

erwin Data Catalog by Quest automates metadata harvesting, curation and mapping to provide a single-source view of metadata across your data landscape. Detailed data lineage, impact analysis, reference data management and lifecycle management provide unparalleled data visibility and management capabilities.

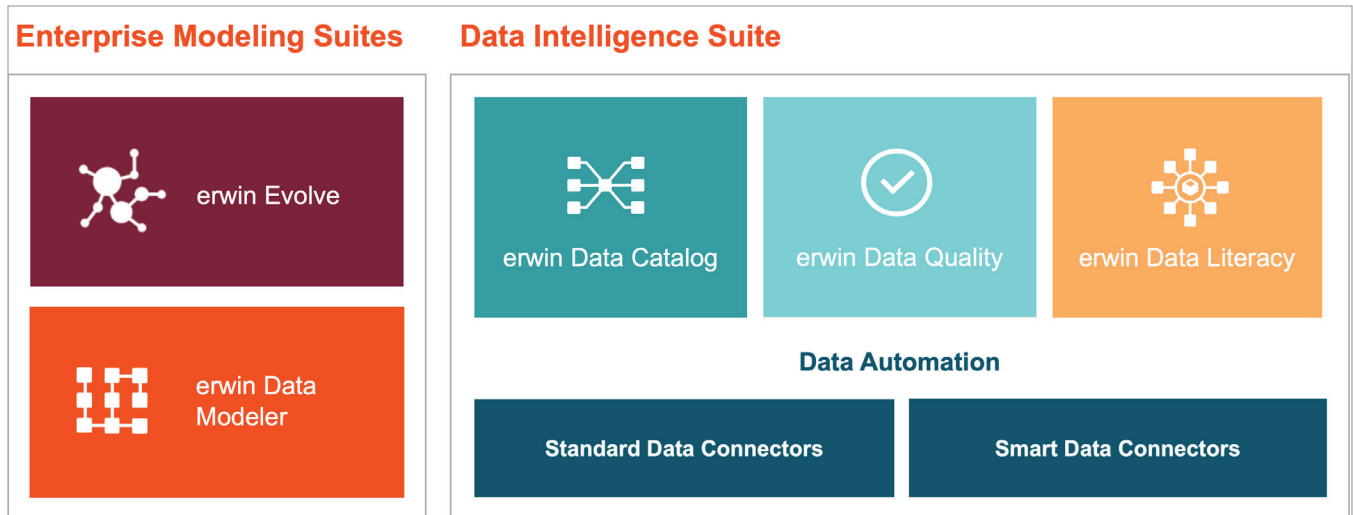

erwin Data Quality

erwin Data Quality by Quest automates data profiling and data quality assessment, provides optional data observability and remediation capabilities, and extends data quality visibility across the enterprise. Initiate data profiling and quality assessment using erwin Data Catalog metadata and leverage automated profiling and quality scoring in the erwin Data Quality platform. Data quality scoring appears throughout erwin Data Intelligence for all users in the data catalog, within data lineage, mind maps and more.

erwin Data Literacy

erwin Data Literacy by Quest provides data stewards and owners with the business glossary and stewardship capabilities to collaboratively define enterprise data in business terms, incorporate policies and manage data governance accountability and workflow. A business-friendly asset discovery and collaboration experience ensures all organizational users can easily find, assess, understand and use appropriately high-value data assets within your enterprise.

The erwin by Quest portfolio

erwin Evolve

erwin Evolve by Quest is full-featured, configurable enterprise architecture and business process modeling and analysis software. Document systems and technology, design processes and value streams, and manage innovation and change with all enterprise architecture and business process artifacts in one place, enabling access and use by both IT and business stakeholders.

About Quest

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Microsoft 365 migration and management, and cybersecurity resilience, Quest helps customers solve their next IT challenge now. Quest Software. Where next meets now.
