

# The erwin® EDGE Portfolio

## AT A GLANCE

erwin® by Quest® provides enterprise modeling and data intelligence software that connects all aspects of your business, technology and data architectures for accurate, real-time insights that fuel results. The erwin EDGE combines enterprise architecture, business process and data modeling with data catalog and data literacy capabilities so stakeholders can harvest, curate, govern, activate and socialize data assets to unleash more potential and greater value across risk management/regulatory compliance, agile innovation and business transformation initiatives. Our ability to harmonize and automate enterprise architecture, business process modeling, data management and data governance gives customers unmatched return on investment as they turn information into opportunities.

### erwin Data Modeler

erwin Data Modeler by Quest is the first and most trusted data modeling software for visualizing metadata and database schema to understand complex data sources, as well as design and deploy new ones. Discover and document any data from anywhere for consistency, clarity and artifact reuse. erwin Data Modeler also includes enterprise-class NoSQL data modeling with support for Couchbase, Cassandra and MongoDB.

### erwin Data Intelligence Suite

The erwin Data Intelligence Suite by Quest unites the capabilities of erwin Data Catalog with erwin Data Literacy for greater awareness of and access to available data assets, guidance on their use, and guardrails to ensure data policies and best practices are followed. Automatically harvest, transform and feed metadata from a wide array of data sources, operational processes, business applications and data models into a central catalog and then make it accessible and understandable within context via role-based views.

### erwin Data Catalog

erwin Data Catalog by Quest automates metadata harvesting, curation and mapping to provide a single-source view of metadata across your data landscape. Detailed data lineage, impact analysis, data profiling, reference data management and lifecycle management provide unparalleled data visibility and management capabilities.

### erwin Data Literacy

erwin Data Literacy by Quest provides data stewards and owners with the business glossary and data discovery capabilities to collaboratively define enterprise data in business terms and manage data governance accountability and workflow. An integrated business user portal enables web-based self-service and contextual data discovery, and provides for role-based collaboration and data socialization throughout your organization.

### erwin Evolve

erwin Evolve by Quest is full-featured, configurable enterprise architecture and business process modeling and analysis software. Document systems and technology, design processes and value

streams, and manage innovation and change with all enterprise architecture and business process artifacts in one place, enabling access and use by both IT and business stakeholders.

### erwin Cloud Catalyst

erwin Cloud Catalyst by Quest is a suite of automated cloud migration, transformation management and data governance software and services. Quickly and accurately document and transform existing data management infrastructures and processes to precisely migrate data from legacy, on-premises databases to the cloud. Find, model, ingest, catalog and govern cloud data assets during their transformation and then throughout their cloud lifecycle.

## ABOUT QUEST

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From maximizing the value of their data, to Active Directory and Office 365 management, and cybersecurity resilience, Quest helps customers solve their next IT challenge now. Quest Software. Where next meets now.
