

Google Workspace Migration

Let Quest manage your Google Workspace migration for you, so you can stay focused on your core business.

During migration projects, it's not uncommon to have to consolidate disparate email and data-sharing systems like Google Workspace into your Microsoft 365 tenant. These assets can include:

- Google Mail content (to Exchange Online)
- Google Drive content (to OneDrive)
- Google Shared Drive content (to Microsoft Teams)

Quest Professional Services can help take the stress out of migration projects, and assist with any IT staffing limitations, by facilitating your Google Workspace migration for you. This full-service approach to Google Workspace migrations helps you stay focused on your core business, while seasoned migration experts address your migration needs from beginning to end.

How does it work? We'll start with a thorough discovery and investigation to make sure all your concerns are managed with care. We'll take that information, and then present you with a plan that identifies the data that needs to be migrated, estimates the time needed to migrate that data, and establishes a data migration strategy that minimizes the impact on your organization.

Then, when you're ready, we'll execute the migration itself – all without having to install any additional software into your IT ecosystem.

Value from experts

Google Workplace migrations can be stressful and daunting for any organization. By using Quest Professional Services, you'll be able to take advantage of our proven migration expertise and ensure that your migration is completed thoroughly and effectively, with all recommended Microsoft best practices.

Full service migration:

- Partner with experts who help you tackle every migration workload
- Create a data migration strategy that minimizes the impact on your organization
- Execute an efficient, effective migration with full documentation and reporting

Documentation and reporting

Quest will complete your migration with care and accuracy — complete with full reports of all migration efforts that will satisfy management and stakeholders.

Proven results

You can depend on Quest to:

- Simplify the discovery of assets to be migrated
- Establish predictable timelines that fit your priorities
- Minimize disruption to end users
- Provide thoughtful data migration guidance
