

GPOADmin Express

Seamless replacement for Microsoft AGPM

With Microsoft Advanced Group Policy Management (AGPM) reaching end of life in April 2026, many organizations are at increased risk of unapproved changes, unmanaged or unenforced policy settings, and weakened security around GPO change control. GPOADmin Express is the simple, seamless way to replace AGPM and regain confidence in your GPO management approach.

Why now?

GPOs are foundational to identity and access control. But without proper safeguards, they are vulnerable to abuse and have become frequent targets in ransomware attacks. And with AGPM sunsetting, customers need a secure, supported and enterprise-ready alternative.

GPOADmin Express capabilities

GPOADmin Express provides essential GPO governance capabilities that help you:

- Enforce GPO change control with check out, versioning, custom workflows and secure multi-level approvals.
- Reduce attack surface with access delegation and role-based permissions, including Review, Edit and Full Control options.
- Recover quickly from mistakes or malicious edits with version history and rollback.
- Track changes with comparison tools to pinpoint what was modified, when and by whom.
- Plan your future with built-in reporting to assess Intune readiness and hybrid AD migration potential.

Upgrade ready

GPOADmin Express is your starter kit for managing GPO changes and establishing secure workflows. When your organization is ready for broader coverage, full GPOADmin delivers the complete suite of enterprise tools for GPO lifecycle management, including reducing attack surface, enforcing policy, continuous monitoring, integration with auditing, and in-depth analysis.

Benefits:

- Maintain control over GPO changes with versioning, check-in/check-out, approval workflows and more.
- Start with confidence using GPOADmin Express, then unlock the full suite of tools in GPOADmin full to further enhance security, monitoring and analysis.
- Assess cloud readiness with built-in reports that highlight which GPOs are suitable for migration to Microsoft Intune.

Ready to get started?

GPOAdmin Express helps you maintain control over your GPOs today while setting the stage for stronger Active Directory and Entra ID security tomorrow. Whether you're replacing AGPM, preparing for Intune or exploring broader GPO protection, GPOAdmin Express is the place to start.

If you're ready, we'd love to chat about your GPO security goals and how we can help you achieve them.

About Quest

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Microsoft 365 migration and management, and cybersecurity resilience, Quest helps customers solve their next IT challenge now. Quest Software. Where next meets now.
