

Reorganize Your Content After You Migrate

You've migrated to a new SharePoint environment, think you're done? Not quite yet. Following your migration it is important to reorganize your content to be sure to have an efficient SharePoint infrastructure. You will also want to manage your content in your new environment for optimal performance.

Ability for ongoing management and content reorganization:					
					
Re-template sites	Map metadata	Promote sites to site collections	Demote site collections	Split lists	Filter out content or sites

Manage Your Content in Your New Environment post-migration, Content Matrix offers the tools to manage content before and after your migration.

Manage Sites, Content and Metadata

Content Matrix empowers you or your site collection owners and users to manage SharePoint sites, content and metadata on an ongoing basis to keep in sync with business needs.

Embrace Unlimited Management

Content Matrix allows unlimited testing, reorganization and management of your SharePoint sites and content.

Improve SharePoint Search

Improve search results by improving metadata. During and after your migration Content Matrix can add, organize, and edit metadata based on content location and other properties.
