

Migration Manager for Email Archives

ZeroIMPACT email archive migration

When it comes to an email archive migration, whether on-premises or cloud, preparation is key. Email archive migrations can be incredibly large and complex projects. Plus, you need to ensure that content remains discoverable and retrievable in the new environment. When you're planning the move, you need to ensure the migration can be completed easily and without downtime or data loss.

Migration Manager for Email Archives helps you seamlessly migrate email archives up to five times faster from various target platforms to Exchange, Office 365 and other cloud systems. With Migration Manager, you can:

- Ensure zero impact on end users by providing anytime access to archives
- Preserve chain-of-custody content with full audit trails and security logs to mitigate risk
- Easily move only what's needed with intelligent filtering to slash migration time and costs

FEATURES

Turbo-powered migrations — Slash migration costs with a fast and efficient transition. Migration Manager for Email Archives includes an advanced, multi-threaded migration engine that enables you to move email archive data to Office 365 and Exchange up to five times faster than other solutions that rely on Exchange Web Services (EWS). You can also install multiple migration consoles to further increase scalability and avoid network bottlenecks.

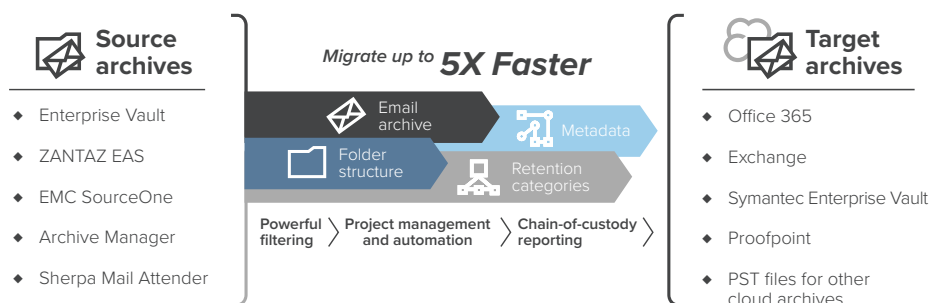

Chain-of-custody compliance — Mitigate legal and regulatory risk by migrating email archives with air-tight security. You can automatically create and store a unique digital fingerprint of every migrated item. This enables you to capture full audit trails and security logs during every step of the migration, while validating that migrated data has not been corrupted or tampered with in any way. You'll also ensure superior fidelity compared to traditional EWS methods, and preserve all folder

Migration Manager for Email Archives enables scalable, multi-threaded migrations to eliminate risk and downtime.

BENEFITS:

- Empowers you to easily manage the migration from a single console
- Automates repetitive tasks such as user mapping
- Delivers real-time progress reports
- Supports multiple sources and targets to meet a wide range of business requirements
- Slashes migration time and costs by enabling you to move data quickly and with minimal network resources
- Enables granular migrations so you can choose what is and isn't being moved
- Eliminates downtime by providing users with continuous access to archives
- Preserves chain-of-custody trails to mitigate legal and compliance risks

ZeroIMPACT email archive migration

Migrate email archives to the environment of your choice up to five times faster than other solutions that rely on Exchange Web Services.

SYSTEM REQUIREMENTS

HARDWARE

Processor: minimum 4 core, 8 recommended

Memory: minimum 4GB, 8GB recommended

2GB of free hard disk space

OPERATING SYSTEM

Windows Server 2008 R2

Windows Server 2012

Windows Server 2012 R2

SOFTWARE

Internet Information Services (IIS) 7.5 or later

.NET Framework 4.5.2

Internet Explorer 9 or later

SQL Server 2008 R2, 2012, 2014

For a full list of system requirements, see the [compatibility guide](#).

structures and metadata (authors, recipients, dates and other properties) during the migration. This makes the chain of custody easier to validate.

ZeroIMPACT transitions — Eliminate downtime by providing end users with continuous access to their archives throughout the project, regardless of migration status. Migration Manager synchronizes user emails to the target environment in the background and then recognizes and syncs daily deltas, giving users access to both the new and original source data. This seamless approach will free your help desk from added stress and user support calls.

Intelligent filters — Control what is and isn't moved with granular filtering to reduce migration risk, time and cost. Select by date or retention category to comply with email retention policies. You can also filter by message type to eliminate unneeded items, such as Notes, Tasks and Drafts.

Advanced automation — Simplify the migration and reduce the risk of manual error by automating core repetitive tasks, such as bulk user mapping, deleting legacy archives and updating shortcuts in Outlook to the correct location of the new email archive. Get real-time

status reports so you can keep users and management informed of migration progress and troubleshoot issues as they arise. Migrate multiple sources and targets with a single solution to meet a wide range of business requirements:

- Migrate from the most common legacy archives such as Symantec Enterprise Vault, HP Autonomy/ZANTAZ EAS, EMC SourceOne, Archive Manager and Sherpa Mail Attender.
- Migrate to Microsoft Exchange or Office 365, Enterprise Vault, Proofpoint or other cloud archives.

ABOUT QUEST

Quest helps our customers reduce tedious administration tasks so they can focus on the innovation necessary for their businesses to grow. Quest® solutions are scalable, affordable and simple-to-use, and they deliver unmatched efficiency and productivity. Combined with Quest's invitation to the global community to be a part of its innovation, as well as our firm commitment to ensuring customer satisfaction, Quest will continue to accelerate the delivery of the most comprehensive solutions for Azure cloud management, SaaS, security, workforce mobility and data-driven insight.
