Migration Manager for PSTs

ZeroIMPACT PST migration

Compliance and e-discovery in managing email stored on user computers is a growing challenge for messaging administrators. Plus, large PST files can be prone to corruption, creating the potential for data loss and other issues.

Migration Manager for PSTs is the ZeroIMPACT solution to automate the identification, migration and elimination of PSTs. Quickly and reliably migrate data to targets such as Office 365, Exchange, Enterprise Vault and hybrid environments.
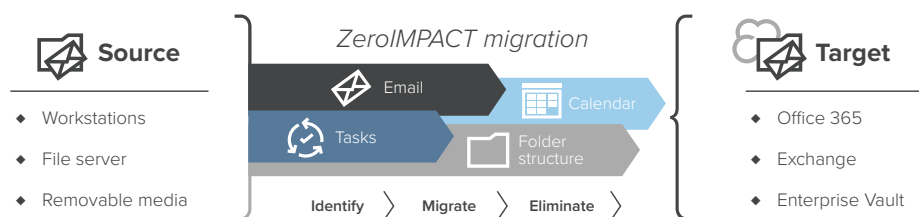

Migration Manager helps reduce security vulnerabilities, ensure compliance and enable robust, multi-platform email availability. Get advanced PST identification, comprehensive project management capabilities, and world-class services and support to ensure success. Migration Manager for PSTs enables you to take control of PSTs once and for all.

> Migration Manager for PSTs makes performing migration easy, quick and seamless.

BENEFITS:

- Gain complete control and automation of PST identification, migration and elimination

- Mitigate data loss or user downtime risk, enabling ZeroIMPACT migrations

- Ensure compliance and security through email retention policies, reporting and authorizations

- Reduce lengthy migration project timelines and cut costs

- Deliver migration accuracy with advanced filtering, verification and deduplication

- Office 365
- Exchange
- Enterprise Vault

Identify, migrate and eliminate PST files with ZeroIMPACT to end users.

FEATURES

ZeroIMPACT on users — Maintain user access to PSTs while Outlook uploads the data to the closest server to ensure users don't experience any disruption.

Comprehensive, intelligent search — Utilize a fast and complete identification tool for PSTs to discover files on devices and locations that other solutions tend to exclude. Intelligent scanning helps you accurately determine ownership to reduce administrative effort when preparing for migration.

Intelligent ownership detection — Utilize intelligent scanning to determine PST ownership more accurately than similar tools via Outlook profile, NTFS permissions and file marking mechanism. This reduces administrative effort and provides the ability to prepare for the migration.

Centralized project management — Manage all tasks through a web-based console with role-based rights for administrators across different sites. Even in multisite environments, all actions can be run from a single dashboard or easily outsourced by publishing to external providers.

Deduplication and filtering — Filter old or irrelevant data and automatically remove duplicated emails. This saves storage space, prevents redundant data in the target and reduces license cost for archives.

Powerful Office 365 support — Optimize Office 365 batching to decrease data sizes and achieve superior migration speeds.

Consolidated backup — Automatically create a central backup of the uploaded data on a generic storage location to protect the user's data and allow end-user access to uploaded PSTs (for example, filtered data).

Live progress monitoring — Access comprehensive data around progress, files identified, files in queue and files migrated with the live dashboard and reporting engine. Quickly check the status, act if any issues occur and select the next batch of files or users for the migration queue directly from the dashboard.

Audit-ready reporting — View management summaries, capacity planning reports and full chain of custody audits for all users and files.

Active Directory-based prioritization — Organize and filter users according to department, site and other Active Directory properties. This flexibility enables you to implement your own priorities and ensures that the migration is completed according to the plan.

ABOUT QUEST

Quest helps our customers reduce tedious administration tasks so they can focus on the innovation necessary for their businesses to grow. Quest® solutions are scalable, affordable and simple-to-use, and they deliver unmatched efficiency and productivity. Combined with Quest's invitation to the global community to be a part of its innovation, as well as our firm commitment to ensuring customer satisfaction, Quest will continue to accelerate the delivery of the most comprehensive solutions for Azure cloud management, SaaS, security, workforce mobility and data-driven insight.
