Gain visibility into your Quest® Rapid Recovery, Foglight® for Virtualization and QoreStor systems across your entire IT environment — anywhere, anytime. Quest QorePortal™ is an intuitive, cloud-based management solution for your Quest data protection products, wherever they’re located, from a single management console.

Quest QorePortal works with Rapid Recovery backup and recovery software, which protects systems, apps and data located anywhere — whether they are physical, virtual or in the cloud. Get greater visibility and control over all your Rapid Recovery cores, from anywhere in your network, making backup and recovery management a breeze.

QorePortal also works with Foglight for Virtualization, the best tool for virtual IT infrastructure optimization — whether it’s in the data center or in the cloud. QorePortal provides a view of your Foglight license usage and meta data about your environment and also captures active and open alarms across your entire virtual IT environment.

QorePortal can also be used to manage your entire QoreStor infrastructure. Instead of managing each QoreStor instance separately, QorePortal provides a global view and full management of all your QoreStor deployments — all in a single UI. With QorePortal, you can more easily manage your QoreStor environment, especially for remote management.

QorePortal also enables managed service providers (MSPs) to track multiple Rapid Recovery, Foglight for Virtualization and QoreStor customer instances.

BENEFITS:
- Gain visibility into Quest-protected/optimized systems across your entire IT environment — anywhere, anytime.
- See and control Rapid Recovery cores from anywhere in your network.
- Visualize license usage, meta data and alarms from Foglight for Virtualization.
- Manage all your QorePortal deduplication infrastructure from a single UI.
- Track multiple customer instances easily — ideal for Managed Service Providers (MSPs).
FEATURE HIGHLIGHTS

Rapid Recovery
When combined with Rapid Recovery backup and recovery software, you’ll be positioned to:

• Monitor all of your Rapid Recovery Core servers wherever they’re located.
• Check the status of all backups, replications and virtual standbys.
• Receive notifications, including error messages and warnings, if action is required.
• Check your backup environment from a smartphone with a mobile-friendly interface.
• Control access at the group or user level for total security. MSPs can access multiple customer instances from a central console.
• Integrate easily with previous Rapid Recovery versions back to version 5.4.

Foglight for Virtualization
When used with Foglight for Virtualization, you’re able to:

• View license usage even outside your network via VPN.
• Get meta data about your entire virtual environment.
• Capture active and open alarms across your virtual environment.
• Integrate easily with Foglight for Virtualization 8.75 or later.

QoreStor™
When you use QorePortal with QoreStor, you’ll be able to:

• See a global view of all your QoreStor deployments.
• Establish full remote administration.
• Eliminate the need for VPN for remote management.
• Enable the use of any internet connected device.

MSPs
QorePortal is perfect for MSPs managing multiple Quest data protection solution customers too.

• Get utilization and charge-back reports to help ensure accurate customer invoicing.
• Streamline Rapid Recovery management with customized views.
• Simplify management of multiple QoreStor deployments across all customers.

Try Quest QorePortal risk-free today to use alongside your Quest data protection solutions. Visit dataprotection.quest.com to learn more.

ABOUT QUEST

At Quest, our purpose is to solve complex problems with simple solutions. We accomplish this with a philosophy focused on great products, great service and an overall goal of being simple to do business with. Our vision is to deliver technology that eliminates the need to choose between efficiency and effectiveness, which means you and your organization can spend less time on IT administration and more time on business innovation.
