Quest Data Protection Portal

Quesť

Cloud-based backup and recovery management across your entire IT environment

Gain end-to-end visibility of all data protection activities across your entire IT environment anywhere, anytime. The Quest Data Protection Portal is an intuitive, cloud-based data protection management solution that enables you to monitor all your backup and recovery operations — wherever they're located from one single management console.

The Quest Data Protection Portal works with Rapid Recovery backup and recovery software, which protects anything – systems, apps and data – anywhere, whether it's physical, virtual or in the cloud. By giving you visibility and control over your Rapid Recovery cores, from anywhere in your network, The Quest Data Protection Portal allows you to perform backups, replications and recoveries from anywhere you can access your network.

Whether it's a new Rapid Recovery deployment, or an existing one, The Quest Data Protection Portal integrates easily with Rapid Recovery, back to version 5.4.

FEATURE HIGHLIGHTS:

- Monitor all of your Rapid Recovery Core servers wherever they're located.
- Check the status of all backups, replications, and virtual standbys.
- Receive notifications including errors and warnings if action is required.
