

## DATA SHEET

# Quest Migrator Pro for Active Directory

Quest Migrator Pro by Quest for Active Directory lets you merge, consolidate, or restructure your Active Directory environment. It securely migrates objects, settings, and properties. You can use it to automate your migration while keeping your migrated and un-migrated users, devices, and applications in sync. And, Quest Migrator Pro for Active Directory includes Quest Directory Sync Pro by Quest for a unified GAL on Day One of any project.

### Features

- Streamlined Active Directory migration and domain consolidation
- AD Analysis reports and charts
- Object and Folder blacklist
- NAS ReACL profiles
- Ability to run custom PowerShell scripts against migrated devices
- Offline domain join process for migrating remote devices (requires trust)
- Agent auto-discover for agents deployed by GPO (requires DNS SRV record)
- Browser based UI for remote administration
- No RPC or remote registry access
- Windows 10 ReACL Rollback

### Benefits

- Domain consolidation
- Scheduled and automated migration operations
- Not interrupting remote end-user productivity
- Highly conducive to migration of workstations in a distributed workforce
- On-premises install for cloud sensitive scenarios

### Notes

- SSL certificate is recommended
- For reporting features SQL Server Reporting Services (SSRS) is required
- Includes Quest Directory Sync Pro
- Professional Services are available

## Specs

### Synchronizations supported

- Active Directory to/from Active Directory
- AD inter/intra forest sync
- Users, Groups, Devices (user workstations and member servers)

### Credential Cache/Offline Domain Join

- Quest Migrator Pro for Active Directory performs offline domain join to the new target domain without needing to VPN or contact a domain controller for the first login by leveraging Microsoft's ability to cache credentials to pre-login users to their new domain prior to device cutover.

## System Requirements

### Console Operating Systems

Windows Server 2012 R2

Windows Server 2016

Windows Server 2019

### Minimum Hardware Requirements

6 GB RAM

10 GB disk

### Sql server versions

2017, 2016, 2014, and 2012 Express

### .net framework

4.5.2+

### supported domain/forest functional levels

2012 R2 and 2016

### supported device/reac/cutover operation systems

Windows 7, 10

Windows Server 2008 R2, 2012, 2012 R2, and 2016

### About Quest Software

Quest Software creates technology and solutions that build the foundation for enterprise AI. Focused on data management and governance, cybersecurity and platform modernization, Quest helps organizations address their most pressing challenges and make the promise of AI a reality. Around the globe, more than 45,000 companies including over 90% of the Fortune 500 count on Quest Software. For more information, visit [www.quest.com](https://www.quest.com) or follow Quest Software on [X \(formerly Twitter\)](#) and [LinkedIn](#).
