

Alkum is an IT company that offers data security and cloud solutions to ensure reliability and solve modern threats and security issues. Alkum focuses on the IT architecture, IT continuity and IT manageability of its customers.

From the customer

“Alkum has been working with Rapid Recovery for many years using the solution for backup/recovery and DR. The easy use of the interface and the **simplicity** that has been applied make it an indispensable solution for us.

Of course, there are more backup products on the market, but they come with a lot of complexity and requirements. Rapid Recovery does not need much, **works effectively** and has **Very valuable** and extensive functionality. I would recommend it to everyone!”

--Erwin Van Workum, Founder/CEO
