

SharePlex® by Quest® for SQL Server and Azure SQL Database

Oracle to SQL Server and Azure SQL Database replication for better business intelligence and reporting

Take advantage of Microsoft business intelligence tools, reduce Oracle license costs, increase scalability, maximize availability and provide near real-time data integration with SharePlex® by Quest® for SQL Server. This simple-to-use solution ensures high availability by transferring intensive data analysis and reporting from Oracle to SQL Server and Azure SQL Database – without impacting OLTP performance. This highly reliable technology offers a low-cost alternative to other replication tools.

With SharePlex for SQL Server, you can easily replicate multiple copies of data locally, remotely or in the cloud to:

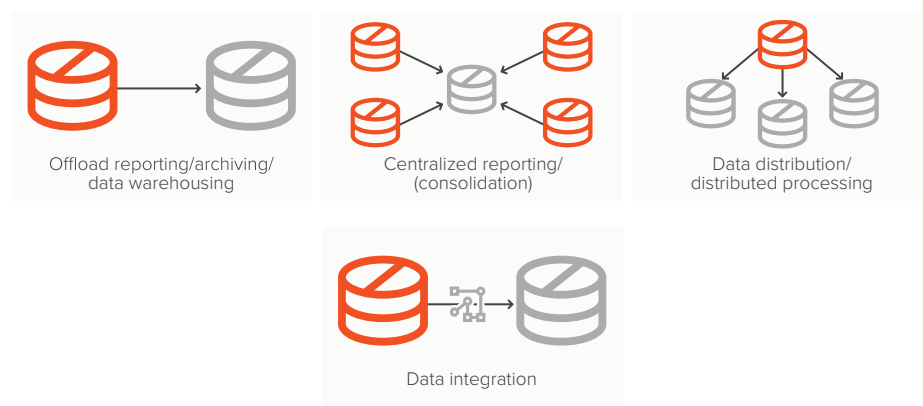

- **Maximize the value of your data** — Support business intelligence and analytics projects with near real-time data integration.
- **Achieve cost-effective scalability** — Isolate and remove the operational reporting and data warehousing loads from Oracle to SQL Server and Azure SQL Database with a near real-time copy of your data.
- **Move Oracle workloads into the cloud** — SQL Server and Azure SQL Database provide a lower-cost reporting platform

and help reduce performance impacts to production Oracle instances.

- **Reduce storage costs** — Archive historical data affordably. Maintain a lean Oracle transaction instance with SQL Server or Azure SQL Database acting as an archive repository.

FEATURES

- **Business intelligence support** — Integrates directly into SQL Server and Azure SQL Database environments to support your business intelligence initiatives.
- **User-defined data delivery** — Facilitates delivery of Oracle data to SQL Server and Azure SQL databases for archiving, analytics, data distribution, distributed processing and centralized reporting.
- **Superior total cost of ownership** — Requires the lowest capital (CapEx) and operational expenditures (OpEx) of all industry-leading solutions. Reduce CapEx with a complete, low-cost solution that includes all the necessary tools for reporting, data warehousing and application integration without requiring any add-ons. Reduce OpEx with a highly coupled solution that provides unrivaled operational and administrative efficiency.

SharePlex use case scenarios when replicating data from Oracle to Microsoft SQL Server and Azure SQL Database.

“With SharePlex, we were able to successfully integrate our Oracle and SQL Server databases without the need for additional programming resources, all while keeping our data secure.”

*Luís Alfredo Rodríguez M.
Infrastructure Administrator
Comunicaciones Empresariales
de Colombia S.A.S.*

BENEFITS:

- Take advantage of Microsoft business intelligence tools
- Achieve cost-effective scalability and offload reporting by leveraging SQL Server targets
- Improve OLTP performance
- Enable real-time reporting and data warehousing
- Optimize business intelligence, reporting and analytics applications for real-time use

- **World-class support** — Provides rapid answers to all your questions and invaluable guidance from industry experts, consistently earning excellent approval ratings from more than 94 percent of customers. Mission-critical, multi-tier support is available 24x7 through multiple, localized, non-outsourced support centers.
- **Services** — Offers implementation, configuration and migration services from a highly qualified and experienced team with a significant track record of customer satisfaction and success.
