Toad® Data Point

Simplify the path from complex data to clear decisions

We live in a multiplatform world, driven by the increased diversity and complexity of data, organizational expansion and modernization efforts. With the benefits that come with evolution come a new batch of struggles, including data silos, inconsistent quality and time-consuming preparation processes. You can't be ill-prepared to face these challenges head-on, as that will hinder your ability to extract actionable, strategic insights.

Toad Data Point is purpose-built to address the challenges that come with complexity. It is a unified platform for data access, preparation and analysis, empowering organizations to integrate directly with any data source, break down silos across the business, ensure data accuracy and streamline workflows.

93% of organizations surveyed utilize multiple database platforms.

Benefits

- Scale effortlessly. Whether your complexity is driven by amount of data or multiple data sources, handle it all in one, trusted tool.
- Faster query development. Reduce the time spent for advanced single-platform or cross-platform SQL queries with an easy-to-use drag and drop interface for quicker insights and faster decision making.
- Improved data analysis. Blend data into one query for a more holistic view of your data. Profile, transform and cleanse your results (add calculations, columns and groupings, find duplicates, etc.) with ease.
- Increased productivity. Eliminate manual tasks, free up valuable time and enhance team efficiency with automation and scheduling.
- Better collaboration. Share data, queries and workflows effortlessly with one-click integration to Toad Intelligence Central for simplification, speed and secure provisioning across the organization.
- Customized interface based on each user's task. Toad Data Point Workbook provides an easy-to-use graphical interface and simplified workflows for business users.

Why Toad Data Point?

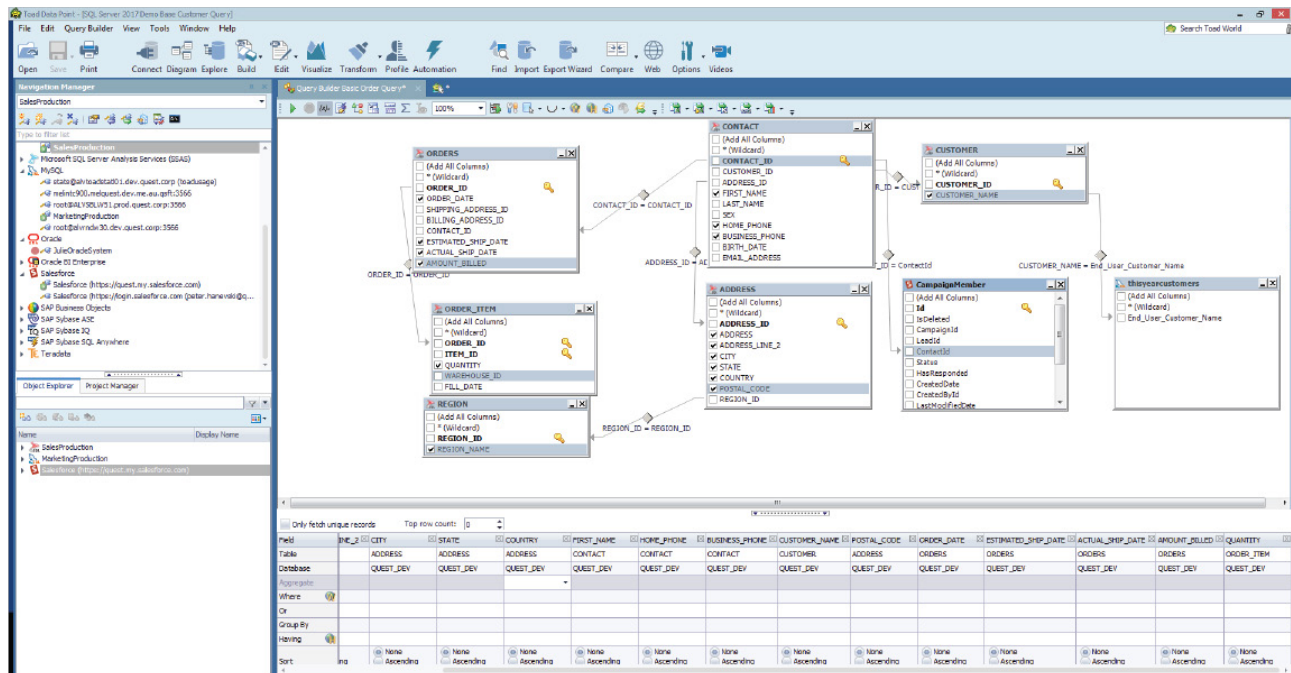

- **Simplify cross-platform data analysis** — Tackle the challenges of managing diverse databases with the trusted tool database professionals rely on. Toad Data Point provides seamless connectivity to a wide range of data sources including SQL, NoSQL, ODBC and business intelligence platforms. Designed to deliver both flexibility and scalability, it ensures you are equipped to handle today's data challenges and are prepared to handle tomorrow's growth. (Visit here for a full list of Toad Data Point's integration capabilities.)
- **Drag-and-drop query building and optimization** — Say adios to complex manual processes with Toad Data Point's visual query builder and automation tools. For new users, intuitive drag-and-drop functionality makes querying simple and accessible. Advanced users can accelerate workflows to free up time for greater efficiency. By automating repetitive tasks, organizations can reduce costs and time spent on data prep, allowing teams to focus on impactful insights.
- **Make data accessible to everyone** — Bridge the gap between technical complexity and accessible analysis with AI Ask and our simplified interface.
- **Choose the interface that works for you** — Toad Data Point adapts to your workflow with two distinct user-friendly interfaces for specific needs. The traditional interface offers advanced features like data comparison, import/export and profiling for technical users who require more customization and control. Meanwhile, the Workbook interface delivers a streamlined experience, simplifying query-to-report workflows for business users. No matter the role or preference, Toad Data Point ensures you have tools specific to you, so that you can analyze data your way.
- **Refine your data, ensure its quality** — Deliver accurate, actionable insights with Toad Data Point's powerful data profiling, transformation and cleansing capabilities. Even non-technical users can easily prepare, refine and present data without writing a single line of code. Even better, these processes are easily repeatable, ensuring ongoing data accuracy and integrity is within reach for data intelligence and AI initiatives.

Feature highlights

Toad Data Point is built to accelerate strategic, data-driven business analysis and decision-making. Packed with essential features, it enables you to analyze your data efficiently across a multiplatform environment.

Features	What it does	Why it matters
AI Ask	Provides natural language data analysis to easily interact with databases	Bridge the skills gap to allow for less experienced users to gain accessibility, efficiency and collaboration
Oracle Fusion access	Users can now connect directly to Oracle Fusion in Toad Data Point, eliminating manual exports and siloed data	Enables faster seamless access for analysis and insights
Automation Engine	Allows you to automate and schedule routine tasks, creating sophisticated workflows to support advanced projects	Boost productivity by eliminating manual processes, enabling users to focus on high-value work and streamline complex workflows for better efficiency
Compare and Sync	Compares and synchronizes data across different sources to ensure consistency and validity	Ensure data accuracy and integrity, helping you maintain reliable insights and avoid discrepancies between systems
Charts and reports	Designs professional charts and graphs to visualize and share data results	Present your data clearly and effectively, making it easier for stakeholders across the organization to understand and act quickly on insights
Import/export utility wizard	Enables you to load/unload data efficiently, with the ability to easily export and publish data to formats like Excel, .CSV, .TXT, HTML, .PDF and more	Ensure seamless data integration and sharing across platforms, saving you time and improving data accessibility for various stakeholders
Data integration	Simplifies data integration by using cross-platform SQL queries to connect and query data across different systems	Streamline data access and management, allowing a unified view of your data without the complexity of handling multiple platforms separately
Local data store	Leverages the embedded database to store and manage data locally, offering direct control over your data	Increase flexibility and agility, reducing dependency on external databases and improving performance for specific workflows
Data cleansing area	Transforms and cleanses your result sets with an easy-to-use interface, allowing you to add calculations, columns, groupings, find duplicates, etc.	Simplify data preparation and ensure accuracy and quality of your data for more reliable and informed decisions
Data visualization	Navigates through interactive data visualizations to gain deeper insights into your result sets	Understand complex data more intuitively, enabling more effective communication and widespread understanding
Data profiling	Accesses a comprehensive collection of advanced mathematical, statistical functions and text algorithms through SQL	Perform complex analyses directly within your queries, saving time and enhancing the depth of your analytical capabilities
Advanced analytics library	Accesses a comprehensive collection of advanced mathematical, statistical functions and text algorithms through SQL	Perform complex analyses directly within your queries, saving time and enhancing the depth of your analytical capabilities

"I need to write queries against all our different database platforms. Toad Data Point saves me time because I'm not hopping around to different tools. I just open Toad Data Point in the morning and I don't have to ever leave it."
