

Vendor-Agnostic Data Storage, Deduplication & Replication

No matter which backup software you use, QoreStor accelerates backup speed, reduces storage costs and replicates to the cloud for disaster recovery.

Accelerate backup performance and significantly reduce storage costs with QoreStor™ software-defined cloud storage, deduplication and replication that works with virtually any backup software. No matter which backup system you have, QoreStor makes backups run faster via protocol accelerators, as well as reduces storage requirements and costs through content-aware, variable block deduplication. In addition, you'll be able to replicate data

to the cloud faster for improved data archiving and disaster recovery.

With QoreStor, you'll shrink backup windows significantly while reducing backup storage more than 80% — all without ripping and replacing your current backup software. Meaning, you'll lower IT costs and maximize your ROI regardless of which backup software, storage hardware, virtualization platform or cloud provider you use.

ABOUT QUEST

Quest provides software solutions for the rapidly changing world of enterprise IT. We help simplify the challenges caused by data explosion, cloud expansion, hybrid data centers, security threats and regulatory requirements. Our portfolio includes solutions for database management, data protection, unified endpoint management, identity and access management and Microsoft platform management.

NetVault	vRanger	Veeam	Commvault	Veritas
Dell/EMC	QoreStor™			Oracle
Micro Focus	Arcserve Backup	HYCU	IBM	SQL

QoreStor works with virtually any backup software, including these brands.
